

LUFTHANSA FINANCE

WHITE PAPER

Foreward

E-commerce application service provides merchant services like Payment Gateway which authorises payment procedures for the businesses, retailers online, Traditional brick and mortar etc. The payment gateway is specialised in providing financial service to its customers. Its stores the database of customers payment procedure. Online merchants rely on the information from you, the merchant, the acquirer, and the issuing bank using encrypt data to keep the tracks away from sensitive card data. Payment gateway looks into threats like fraud management or anything similar.

This right here is the most accessible, User friendly and efficient payment solution that's just a Click away.

Considering the heightened value of crypto currency Lufthansa finance is involving the same in establishing its market capitalisation Across the globel.

LUFTHANSA FINANCE

Introduction

crypto currency Blockchain that is based in Binanc

e smart network is an integration of the onlinepayment gateway process in Lufthansa finance. By decentralisir funds efficiently across various block chains. Meta verse ecosystem and Meta Verse Function are used for smooth transaction by Lufthansa finance. Meta verse function can be accessed by everyone with API functions. Lufthansa payment will eventually be integrated with WordPress, Opencart, Shopify, HTM/PHP, and also custom API, You can enjoy a safe online payment with Lufthansa which keeps your account secure and reliable

Multiple payment gateways like PayPal, coin payment, stripe etc can be used for depositing the money.

Lufthansa has also developed a Yield Farming Protocol with NFT stacking game(NFT) theme., which is a decentralised digital platform that promotes investing digital assets. This process generates passive income much faster than doing it manually.
